

How to configure smartermail account in iPhone using POP3?

Follow these step-by-step instructions to set up your email account on your iPhone

1. Select **Settings** from the home screen of your iPhone:

2. Choose **Mail, Contacts, Calendars** and click **Add Account**:

Settings Mail, Contacts, Calendars

ACCOUNTS

iCloud >
Contacts, Calendars and 3 more...

Add Account >

Fetch New Data Off >

MAIL

Preview 1 Line >

Show To/Cc Label

Flag Style Color >

3. Choose **Other** from the list that appears:

Mail... Add Account

Exchange

Google™

YAHOO!

Aol.

Outlook.com

Other

4. Select **Add Mail Account**. In the **New Account** menu, you will need to specify the following records:
- **Name** – your name (will appear as sender name)
 - **Address** – your full email address
 - **Password** – the password for this email address
 - **Description** – lets you specify any description (we suggest you use your email address)
 - Click **Next**

The screenshot shows a 'New Account' form with the following fields and values:

Field	Value
Name	user1
Email	user1@domain.com
Password	●●●●●●●●●●
Description	Company email

A keyboard overlay is visible at the bottom of the form, showing the QWERTY layout with keys for Q, W, E, R, T, Y, U, I, O, P, A, S, D, F, G, H, J, K, L, Z, X, C, V, B, N, M, space, and return.

5. Select protocol type: **POP**
6. Settings for both **POP**
 - **Name, Address and Description:** should have been already filled in
 - **Host name:** mail.domain.com
 - **User Name:** your email address
 - **Password:** password for your email
 - In the fields for both **Incoming Mail Server** and **Outgoing Mail Server**, indicate the following settings:
 - Click **Next**.

Cancel **New Account** Next

IMAP **POP**

Name user1

Email user1@domain.com

Description Company email

INCOMING MAIL SERVER

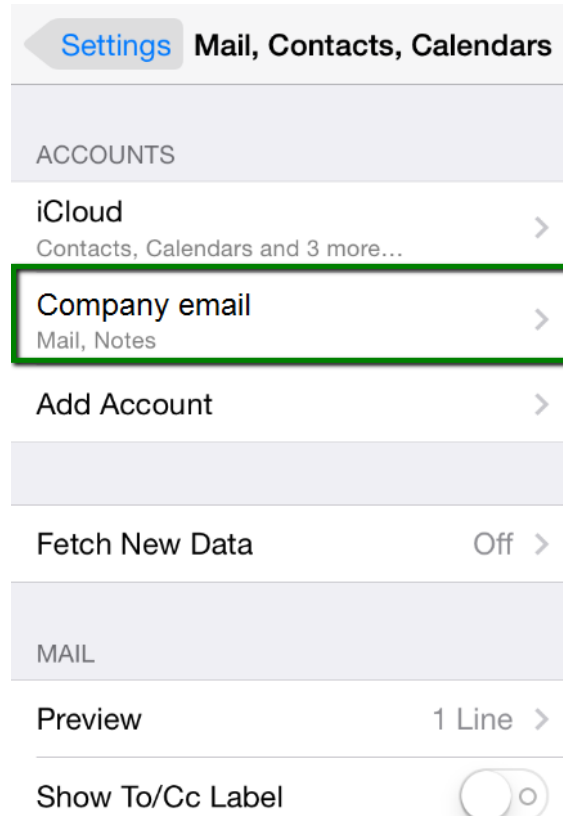

Host Name mail.domain.com

User Name user1@domain.com

Password ●●●●●●●●●●

7. When the checks are finished, you'll be redirected to the **Mail, Contacts, Calendars** screen. Choose your newly created account there:

8. Scroll down and select **Advanced**:

DESCRIPTION NOTES

Cancel Account Done

INCOMING MAIL SERVER

Host Name mail.domain.com

User Name user1@domain.com

Password ●●●●●●●●●●

OUTGOING MAIL SERVER

SMTP mail.domain.com >

Advanced >

9. Here you can choose additional settings for **POP**

- Remove email form server (optional)
- Use SSL: **NONE**
- Authentication: **Password**
- Server Port: **110**

Account **Advanced**
