Any business that wish to reach to 1.3 billion users who will have Internet access on their mobile by 2008\* needs a .mobi site. (\* Source: GSM Association, 2006)

.Mobi site is the trust-mark for mobile users. It conveys the message to the user that says: "This site will definitely works on my mobile device."

## **.mobi history**

.mobi domain name was launched in October 2006. It is the first and only top level domain dedicated to mobile users who access the Internet via their mobile device. More than 500,000 .mobi domain names has been registered in 104 countries as at May 2007\*\*. (\*\* Source: dotMobi, 2007)

## **What is a .mobi website**

Since the existence of Internet, all the internet protocols and services are designed for desktop or laptop oriented services, not for mobile devices browsing.

However, the world has changed. Today, more and more people access to the Internet via their mobile device. The number has increased exponentially.

### **The existing complex website will not be mobile-friendly. Why?:**

- Huge graphics
- Flash
- Deep-down navigations
- Frames

We accept the following:

Terms & Condition Apply.

## Features Cont'd

### All the above leads to unfavorable viewing experience:

Not able to display appropriately on the mobile device  
Slow access  
Long loading times

### As a result:

Costly mobile bills  
"STOP" browsing

Therefore, the solution is to have your .mobi website.

---
